Subject: Letter of Reference for Precision Gas Turbines and Sonomatic

To whom it may concern,

Precision Gas Turbines (PGT) was contracted by WGPO in the spring of 2009 to perform a 100K hour major/ LTE on a single V84.2 machine at the SPA Cogen III facility in Sacramento. On short notice, PGT subcontracted Sonomatic to perform the NDE services. PGT and Sonomatic's efforts resulted in one of the most uneventful and best managed major outages that I have been involved with. PGT's diligence in ensuring that when any minor issue arose that it was communicated immediately and resolved promptly which kept the schedule on time. PGT and Sonomatic's high level of quality was duly noted by the owner and WGPO's Executive Management. WGPO gives PGT and Sonomatic the highest possible recommendation.

If there are any questions, please do not hesitate to call.

Regards,
